

Opinion polling for the next German federal election

In the run-up to the [next German federal election](#) following the [23 February 2025 election](#), which needs to take place on or before 25 March 2029, various organisations have carried out [opinion polling](#) to gauge voting intentions. Results of such polls are displayed below.

Electoral threshold of 5%

Seats in the Bundestag are allocated to parties that either receive at least 5 percent of proportional votes (called "second votes" in Germany as the option appears second on the ballot, after the constituency or "first vote"), or win at least three constituencies. In the [2021 German federal election](#), Die Linke (The Left) won 3 constituencies and thus received proportional representation despite receiving just 4.9% of second votes. In 2022, this three constituency provision was abolished but was later reinstated by the [Federal Constitutional Court](#). In addition to Die Linke, this also benefits the [Christian Social Union in Bavaria](#) (CSU), which competes only in [Bavaria](#), and therefore has often been close to missing the 5% nationwide despite regularly winning all constituencies in the state. As the CDU does not run in Bavaria, only a few polls show the CDU and CSU as separate parties, with most combining the [CDU/CSU](#) as the Union. The two parties always coalition together in the federal level and agree on the vast majority of issues.

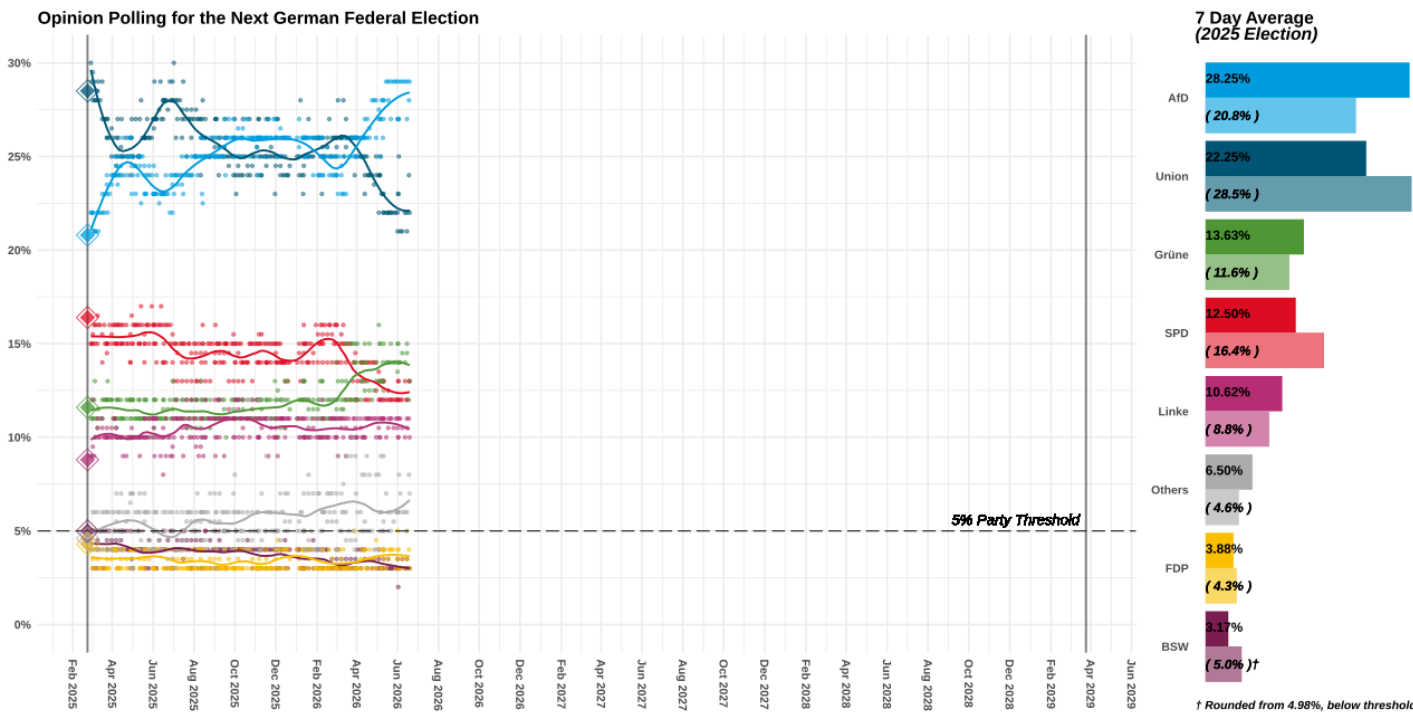

In the [2025 German federal election](#), both the [Free Democratic Party](#) (FDP) and [Sahra Wagenknecht Alliance](#) (BSW) narrowly failed to meet the 5% electoral threshold to gain parliamentary representation. Both of these parties are present in a few state parliaments and even in state governments, and are still regularly polled despite not being present in the 21st Bundestag. Some polls include the Free Voters (FW), a general name used by unaffiliated groups in local elections, which was adopted by a party that is present in three state parliaments ([Bavaria](#), [Rhineland-Palatinate](#), and [Saxony](#)) and one state government coalition (Bavaria). Other parties are categorised as "others".

Reliability of pollsters

The poll aggregator [Europe Elects](#) provides a list of past pollster accuracy and conflict of interest on its website. The organization includes *Allensbach*, *Forsa*, *Forschungsgruppe Wahlen*, *GMS*, *Infratest dimap*, *INSA*, *Ipsos*, *Verian*, *YouGov*, *pollytix*, *Trend research*, and *pmg - policy matters* in its databases and highlights their reliability and transparency. All of them are part of professional pollster associations. Civey is excluded and their lack of methodological rigour referenced. Below-listed *Wahlkreisprognose* and America-based *Democracy Institute* are excluded from Europe Elects's coverage. The poll aggregator points out that they have no membership in a professional association.^[1]

Constituency projections

With the 2023 electoral reform fixing the number of seats to 630, constituency seats are only awarded if covered by the votes cast for the party in that state. As such, the number of constituency seats won by a party may be lower than that party's number of constituency pluralities.^[14] In the 2025 German federal election, 23 constituency winners were left out.

Constituency pluralities

<u>2025 federal election</u>	23 Feb 2025	111	82	79	22	5

Notes

- a. Rounded from 4.98%, which is below the threshold for parliamentary representation in Germany.
- b. Coalition would break the *cordon sanitaire*/firewall against the far-right in Germany with the AfD.
